Functional explanation

employees use company computers to avoid the use of P2P, FTP or pirated software, bandwidth consumption of resources and the impact of goodwill the company. Designed to address the application control, on its own staff to install unauthorized software, or do not meet the company's software to do the blockade policy.

Examples

enterprise software programs, many of the improper use of IT staff faced problems such as the use of pirated software will cause companies to face legal action and huge losses. Staff in the office or the use of P2P software such as Foxy, a waste of valuable bandwidth resources may result in the loopholes in the system. By "the use of program control" feature, employees can quickly understand the computer to install all the software

assets. And for unauthorized use of software restrictions, network management personnel to provide rapid management of the large number of computers the best solution.
