### Functional explanation

clear that the staff in computer software to install, remove illegal software can be remote. When they find out or remove the unauthorized installation of software, the system immediately notified the department in charge of management and staff. Pirated software to avoid misuse and malicious programs installed, the impact of goodwill and loss caused by the company.

### Examples

the use of a computer user's habits, often to download, install the application also varied, which is caused by one of the leading causes of computer failure. Through the "software asset management" will show the software installed in the computer software and transaction records, and through real-time notifications, network management personnel at any time

to allow the state to master the computer.
