Skype encryption can be easily recorded!

Federal Communications Commission Chairman Michael Powell said:

"Skype can be used to dial anywhere in the world's telephone network, and excellent sound quality, free of charge. This is now the world will be inevitable changes."

Skype calls or send instant messages to automatically transfer files using high-density 256bit encryption of all data and then transmit the information through the Internet, and decrypt the information received at the scene. So the convenience of Skype, business users quickly become an essential tool links, but also caused the leakage of confidential company of one of the best pipelines.

related products on the market at present, only for the record, or restrictions on the use of Skype network traffic, but it can not effectively Skype recorded message. MISKeeper for Skype to provide the best side of the recorded message function to provide a more complete all-round protection.
